

Argosy Omnimedia, Inc's AgentProxy.com site is a licensable product that embodies Argosy's expertise in the design and development of programmable agents for e-Business applications.

Argosy recognized in early 1999 that, for a Buyer, the process of placing a bid on an item at a consumer auction site like eBay was extremely tedious and virtually impossible to win for items that were in high demand.

AgentProxy is a bid automation service for Buyer/Bidders who use consumer oriented auction sites such as Ebay, Yahoo, Amazon or Ubid auction sites. AgentProxy has automated the Buyer Side interaction and transaction processing of these sites in order to empower the Buyer with automation tools, agents and proxy services that *"balance the online auction playing field"* which has historically favored the Seller with Seller Side automation tools.

AgentProxy automates the bidding of the Buyer by allowing the Buyer to search multiple auction sites for an item through one screen, pre-program their maximum price that they would bid for one or more items, and even aggregate multiple bids into what is known as a "cascade" in order to increase the probability that a Buyer gets one of the items at the lowest possible price.

Once the Buyer has setup the bidding parameters, their AgentProxy agent monitors the progress of the auction, notifies them via email and pager if the price exceeds their maximum and then "battles" with other bidders and house proxies (eBay and others auction sites have a similar feature that exposes the maximum bids to challenges earlier in the auction cycle) in order to win the bid in the final seconds of the auction.

With AgentProxy, you can;

- Search Multiple Auction Sites from a Single Meta-Search Tool
- Enter Your Auction Site Credentials Only Once (When You Register on AgentProxy)
- Select One or More Items to Bid On and Place Them into Your Online Portfolio.
- Create a Cascade Bid that will execute multiple bids on commodity products until it wins one of them at the lowest possible price!
- Set the Maximum Price that You Would Ever Pay (Eliminate Buyer's Remorse)
- Leave it to the Agents to Do The Rest of the Work!
